

# Kuan-Lin Chen

## Junior Front-End Developer

 Yilan City, Taiwan

Tel : +886-978-027-379

## Objective

Wish to obtain a front-end software engineer position in Houzz.

[One of my projects](#) created with React is a website for users to enter an image url so faces could be detected in the picture (via Clarifai API). The website also includes simple sign up/in/out functions.

[The other project](#) is also created with React, which is an online clothes shop. I applied Google firebase to manage users' accounts and stripe API to emulate real checkout process.

To find out more, visit my [personal portfolio](#).

## Skills

- Javascript (ES6)
- HTML & CSS
- React.js
- Basic Node.js & Express.js
- Git

## Employment History

### Bespoke Consultant October 2018 - November 2019

**GaoWu Collection, Taipei.**

Organized systematic process for customers to select different fabrics for bespoke suits. Optimized outfits for customers for specific occasions. Planned several events promoting gentlemen's styles.

Major Accomplishment:

Best one-day performance: 210,000NTD(7,500 USD), accounted for 20% of monthly revenue.

### Editorial Assistant April 2017 - July 2018

**Journal of the Taiwan Institute of Chemical Engineers, Hsinchu.**

Screening research papers submitted by scholars worldwide. Arranged annual editorial meeting, optimized the process of reviewing papers.

Major Accomplishment:

Netherlands publisher Elsevier reduced 600,000NTD(20,000USD) of our commission fee due to my better efficiency in the reviewing process.
